Design and SketchingStudents sketch their town layouts on paper, labeling each feature with the corresponding shapes. This stage encourages careful planning and allows students to experiment with different configurations before actual construction.

Construction PhaseUsing materials like craft sticks, paper, foam shapes, or building blocks, students build their models. The emphasis is on accurately representing geometric shapes and understanding their

spatial relationships. Teachers often provide a rubric checklist at this stage to guide students on what to include and how to demonstrate their understanding.

Reflection and Evaluation

Once construction is complete, students assess their work using the project rubric. They reflect on questions such as: Did I use a variety of geometric shapes? Are my shapes correctly identified and labeled? Does my town have a logical layout? How creative is my design? Can I explain my choices clearly?

Presentation and Sharing

Finally, students present their towns to classmates, explaining their design process, the shapes used, and how their town functions. This step promotes communication skills and allows for peer feedback.

The Rubric: Clear Criteria for Fair Assessment

A well-designed rubric is vital to ensure students understand how their work will be evaluated. Typical categories include:
